
Content with notebooks

Simon Kamerling

Sep 02, 2021

CONTENTS

1	Markdown + notebooks	3
2	MyST markdown	5
3	Code blocks and outputs	7

You can also create content with Jupyter Notebooks. This means that you can include code blocks and their outputs in your book.

MARKDOWN + NOTEBOOKS

As it is markdown, you can embed images, HTML, etc into your posts!

You can also add_{math} and

$math^{blocks}$

or

$mean^{a_{tex}}$

$mathblocks$

But make sure you escape your dollar signs you want to keep!

MYST MARKDOWN

MyST markdown works in Jupyter Notebooks as well. For more information about MyST markdown, check out [the MyST guide in Jupyter Book](#), or see the [MyST markdown documentation](#).

CODE BLOCKS AND OUTPUTS

Jupyter Book will also embed your code blocks and output in your book. For example, here's some sample Matplotlib code:

```
from matplotlib import rcParams, cycler
import matplotlib.pyplot as plt
import numpy as np
plt.ion()
```

```
# Fixing random state for reproducibility
np.random.seed(19680801)

N = 10
data = [np.logspace(0, 1, 100) + np.random.randn(100) + ii for ii in range(N)]
data = np.array(data).T
cmap = plt.cm.coolwarm
rcParams['axes.prop_cycle'] = cycler(color=cmap(np.linspace(0, 1, N)))

from matplotlib.lines import Line2D
custom_lines = [Line2D([0], [0], color=cmap(0.), lw=4),
                 Line2D([0], [0], color=cmap(.5), lw=4),
                 Line2D([0], [0], color=cmap(1.), lw=4)]

fig, ax = plt.subplots(figsize=(10, 5))
lines = ax.plot(data)
ax.legend(custom_lines, ['Cold', 'Medium', 'Hot']);
```

There is a lot more that you can do with outputs (such as including interactive outputs) with your book. For more information about this, see [the Jupyter Book documentation](#)
